

CASES AND BUNGALOWS

HOUSING

Safetran cases, and bungalows are designed and built tough to stand up to the most challenging conditions. We build the control equipment, so we realize what's necessary in a protective housing. So all cases, and bungalows Safetran manufactures are designed and built to be weather secure and highly vandal-resistant.

Safetran offers a full line of enclosures to suit every need, from pole-mounted boxes to the largest cases and bungalows.

All Safetran cases, and bungalows are constructed of either painted steel, Cor-Ten® steel or aluminum. Cor-Ten® steel or aluminum offers virtually maintenance-free service.

Where heating or cooling is required. Safetran insulated houses offer uniform temperature as well as substantial energy savings.

Galvanized steel foundation units provide strong support in any soil and are easy to install.

Also available are integrated foundations that mount inside the structure for shipping. They telescope down and bolt lock into position for field installation and future leveling.

For your surge protection, faraday shields are available for houses and cases
