

In hot box detectors, there is only one No. 1.

For more than 25 years, the SERVO name has been synonymous with the state-of-the-art in hot box detector systems. The SERVOSCAN® Hot Box Detective® is far and away the No. 1 choice of 85 railroads in 29 countries throughout the world. Many factors have contributed to SERVO's clear-cut leadership. Here are just a few of them:

Fact: SERVO's quarter-century of research, engineering, production and in-service operating experience with HBD's is unmatched by any other company. Today, more than ever before, SERVO maintains the industry's most active, productive program of technological innovation and development—dedicated to making HBD's even more reliable, more cost-effective and more responsive to the vital needs of today's and tomorrow's railroads.

Fact: That experience and dedication stand behind each and every one of the thousands of SERVO HBD systems delivered—three times more than the combined total of all other makes!

Fact: Only SERVO offers such a complete product line of HBD systems and compatible optional equipment of its own design and manufacture to meet individual railroad requirements—such as choice of scanner configurations, remote or trackside readout devices, automatic bearing identification, and customized test/maintenance equipment.

In addition, our energy-saving SERVOTHERM® Hot Wheel Detective® provides a whole new dimension of added protection. Besides minimizing wheel cracks, wheel flats and bearing damage, it saves precious fuel by eliminating train drag caused by stuck brakes.

Fact: At SERVO, HBD systems are not just another small part of a vast, far-flung product line in a large corporate structure. Quite the opposite is true—HBD's are our most important product line. We have achieved and continue to maintain our No. 1 position because we are a company small enough and interested enough to provide the truly complete services that you, our customers, really want and need—delivered by SERVO's team of highly trained, experienced people who know HBD's inside-out, from application engineers to field service engineers, and from regional or world-wide sales personnel to corporate management personnel. We'll always remember that you're No. 1 to us!
